

## Noise

Pinnacle Associates offers unrivalled expertise in the field of noise assessment.

Our team have sat on a British Standard Institute panel and co-authored several publications on professional noise practice.

We have over 20 years local government experience as a professional noise specialists, and a further 10 years within services as diverse as corporate policy, performance, marketing, PR, and customer relations.

Much of this experience has involved solving noise problems and, via the planning process - preventing them.

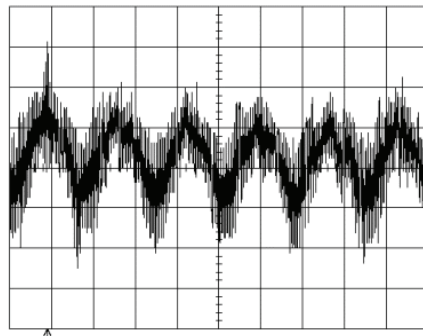

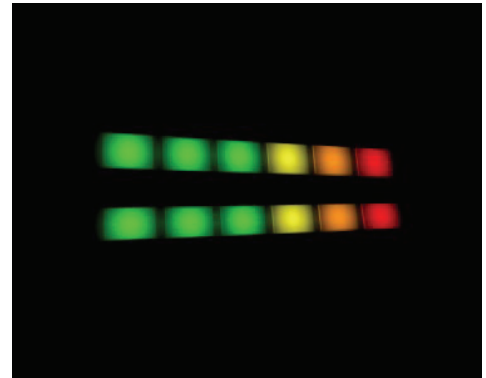

We are familiar with the legislation, guidance and technology involved in industrial and environmental noise control.

From the initial review of requirements, planning application advice, building and services design to planning appeal support, we provide an integrated range of services to Clients.

Our experience includes:

- Road, rail and aircraft noise
- Noise attenuation from building services
- Assessment of noise nuisance, and loss of residential amenity
- Sound insulation schemes
- Development control processes and other statutory noise instruments
- Planning appeals and Public Inquiries
- Noise measurement and analysis
- Boundary assessments and noise contours

Our understanding of noise issues, regulatory requirements and attenuation experience makes us your natural choice for practical and commercially objective advice.
