

References – AgustaWestland (UK) Yeovil

“Pinnacle Associates have provided Westland Helicopters Limited and Westland Transmissions Limited (AgustaWestland UK) with a variety of environmental management support including:

- *Provision of on site strategic advice and guidance on Environment Agency/Local Authority Environmental Permit compliance requirements,*
- *Strategic compliance advice, successfully delivered through a site based presence, seamlessly integrating into the Companies Safety and Environment team.*
- *Implementation support of an Environmental Management System to ISO 14001 which includes a significant alignment and integration of Health, Safety and Quality systems.*
- *More recent work has involved support in the development of a Sustainability Policy and programmes in relation to customer requirements and guidance on hazardous materials/REACH.*

Pinnacle’s support has been invaluable to me and AgustaWestland UK in allowing us to meet our strategic objectives and targets as well those relating to our parent Company, Finmeccanica

I would have no hesitation in recommending Pinnacle to other organisations seeking similar services.”

Top qualities: Great Results, Personable, High Integrity

Andy Hunns
Safety and Environment
Manager,
AgustaWestland UK

“Pinnacle Associates provided consultancy support for AgustaWestland (Westland Helicopters Ltd) in helping us to understand the complex implications of UK Government Policy, Government Department and MOD policies, commitments, plans and instructions on sustainability in relation to ongoing and future procurement programmes, including Project Orientated Environmental Management System (POEMS) principles.

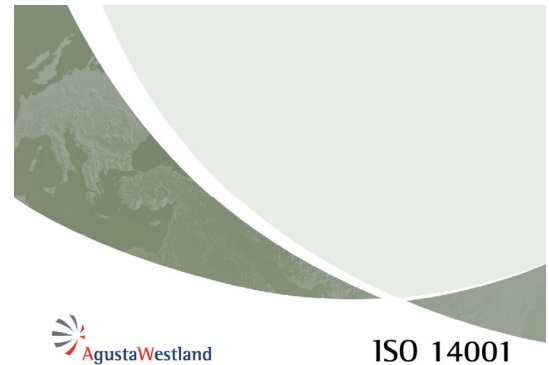

The results of Pinnacle’s review were clear and concise. The output fully satisfied the customers requirement and I would recommend him for similar projects.”

Top qualities: Great Results, Expert, On Time
