

Environmental Permitting and Licensing

Pinnacle Associates offers unrivalled expertise in the field of Environmental Permitting for industry and waste management.

From the initial review of requirements, application site reports, EMS development and implementation to submission of the permit application we provide an integrated package of services to our Clients.

Pinnacle Associates can draw upon a multidisciplinary team with extensive practical experience across a range of industrial sectors.

For our clients we have carried out the following work to support their Environmental Permitting applications and Variations:

- Environmental Permitting GAP analysis
- Air quality sampling, monitoring and noise assessments
- Energy benchmarking
- Closure Plans
- Decommissioning Environmental Management Plans (DEMP)
- Materials review and Management
- BAT assessments
- Site condition reports
- Hydrological risk assessments
- EMS development and implementation

We are able to complement our Environmental Permitting and licensing work with technology review, risk assessment and planning services.

We have worked in partnership with clients in various industrial areas including:

- Aerospace
- Refining
- Food and beverage production
- Organic and inorganic chemicals
- Combustion activities
- Metal treatment
- Waste management and recycling

Our understanding of environmental issues, regulatory requirements and Environmental Permitting application experience makes Pinnacle Associates the natural choice for practical and commercially objective advice.
